

# NFPA 1584 Firefighter REHAB

## Turn-key Rehabilitation and Accountability System

2015  
Edition

### NFPA 1584 - More Than Just a Standard

A commitment to proper firefighter rehab is a commitment to your personnel's health and safety. Developing an effective process, however, can be challenging. The DMS 1584-compliant rehab system provides a simple and scalable method to deploy incident rehabilitation with the required documentation and accountability process.

Manager Station

### Intuitive Workflow-based Design

- Simplifies rehab into a simple step-by-step process.
- Self-teaching system is easy to learn and easy to use.
- Ensures proper and effective rehabilitation of personnel.
- Meets all updated NFPA 1584 process requirements.
- Includes quick-reference to all 1584 charts and SOPs.

### Accurate Accountability Procedure

- Numerical-matching color-coded check-in / release process.
- Log multiple crews or individuals simultaneously.
- Logs and tags provide a permanent record of rehab activity.
- Bar-code enabled tags allow for integration into ePCRs.

### Tag-driven System for Optimized Rehab

- Eliminates issues of marker-based accountability systems.
- Tags are proven to keep members in rehab until released.
- Rugged waterproof tags resist misting, rain and sweat.
- Name / tag-number correlation provides HIPPA privacy.

Accountability Log and Rehab Tag

### DMS-05987

#### System contents:

Manager station portfolio with NFPA 1584, 2015 reference material, charts and Quick-Start Guide, 100 DMS-05986 Rehab Tags with enough Rehab Accountability Logs to track 100 members, 4 pads of weather forms, clipboard, pen, and training DVD.
